

DIDSURY PIONEER

VOL XXIX, No. 33

DIDSURY, ALBERTA, THURSDAY, AUGUST 18, 1982

\$2.00 per Year. 5 cents a copy.

Demise.

Mrs. H. W. CHAMBERS,

The people of Didsbury were considerably shocked on Tuesday morning, when they learned of the sudden death of Mrs. H. W. Chambers.

Mrs. Chambers had been illposed for several days and had been in the Innisfail Hospital for treatment. On Monday she was thought sufficiently recovered to be removed to her home, but, however, she suddenly passed away on Tuesday morning.

The funeral service will be held at the residence today (Thursday) at 1 p.m. The remains will be taken to Embro, Ont. for interment.

W. H. CHAMBERLIN.

Mr. Wm. H. Chamberlin passed away at the Didsbury General Hospital on Wednesday morning. He had been in failing health for some time and was taken to the hospital about a week ago.

The deceased was 71 years of age and was born at Chelsea, Ont. He came to Didsbury with his family from B.C. eleven years ago and has been in business here since that time. He is survived by: his widow and daughter, Florence, of Didsbury, and a daughter, Mrs. Petrequin, of Chicago.

The funeral service will be held in the United Church tomorrow afternoon (Friday) at 2:30 o'clock.

NEIL LAMONT.

Neil Lamont, 17 years old, son of Mr. and Mrs. Duncan Lamont, passed away at the Red Cross Hospital, Calgary on Wednesday morning.

For the past four years the boy, who was a cripple, had been receiving treatment at the Red Cross Hospital. The remains will be brought to Didsbury, and the funeral service will be held in the United Church on Saturday afternoon at 2:30 o'clock.

Mr. Dick Jackson, radio announcer for the Edmonton Bulletin, spent a short time with Didsbury friends on Wednesday.

Enters Softball Playoff.

The Didsbury Softball Club has entered a team in the Alberta Provincial Playoffs. They were given a bye in the earlier games, and are scheduled to play the winners of the Calgary-Cochrane game.

The games will be home-and-home and the best two out of three. The dates have not yet been set.

Twine For 1932 Crop.

3,200 carloads, or 18,000,000 lbs. of binder twine are the estimated requirements for binding up the wheat crop of western Canada this year, according to the Agricultural Dept. of the C.N.R.

In terms of relativity these figures are equivalent to 2,045 miles, or enough twine to go around the earth 88 times.

The lawn supper and dance held at the home of Mrs. E. K. Pratt, east of town, under the auspices of St. Cyprian's W.A., last Friday night was attended by a good crowd. After supper a social hour was spent, followed by dancing in the moonlight, the music being supplied by Mr. Oren Russell, Bill Brown and Albert McLean. The party eventually dispersed about 3 o'clock the following morning, after voting this one of the most enjoyable evenings.

—

The Didsbury Jersey Farms have just received a bull from Brampton, Ont.: Brampton Standard Sultan, grandson of the world-famous Sultan of Olds, of Ontario. His dam is Brampton Favorite Silver, imported from Jersey Island. She was in town for a few days.

Mr. and Mrs. B. C. Lewis and son, of Winnipeg, visited with Mr. and Mrs. Ivan Weber last week while enroute for Vancouver.

Miss Laura Smith, Miss Florence Elder, Mr. Wilmer Sutherland and Mr. Lee Russell returned Sunday from a vacation trip to the coast.

Mr. A. L. Russell, who has been spending the holiday with his parents at Carriole, was in town for a few days this week.

Mr. E. V. Woodlock returned on Sunday from a two weeks' vacation at Sylvan Lake. He is now on the job at the Alberta Pacific Elevator.

Mr. A. Reiber, who has been attending summer school at the University of Alberta, returned home last week.

Mr. C. H. Adshead and family left Monday for Wynyard, B.C., where they will spend a vacation with Mrs. Adshead's parents.

Miss Jessie McCoy, who has been visiting at the Ranton cottage at South Cooking Lake, returned home last week-end.

Mr. and Mrs. A. Schwesinger and son Eric motored to Sylvan Lake on Saturday and were accompanied home by their daughter, Matilda, and Maisie Sinclair, who had been staying at the C.G.I.T. camp at the lake.

At the meeting of the Olds Town Council held in the Town Hall on Monday, Aug. 8th, the councillors were pleased to vote for a reduction of taxes, which was set at 48 mills as against 50 mills in 1931. The changes made were: a raising of the general tax from 17 to 19 mills, and a lowering of the school tax from 27 to 23 mills, making the total reduction of 2 mills. Debenture tax levy remains the same at 6 mills, also the supplementary revenue land tax is stationary at 2 mills. The rural school tax is 10 mills, the same as last year. —Olds Gazette.

LOCAL & GENERAL

The Misses Nelda and Dorothy Woodlock are visiting with Mrs. E. V. Woodlock at Sylvan Lake.

Mr. H. O. Tonjum commenced work with the Atlas Lumber Co this week.

Mr. Jack Currie is relieving at the Jenkins' store at Innisfail for a short time.

Mr. and Mrs. J. V. Berscht drove to Kitecote, Alberta on Monday, where they will visit relatives.

Mr. Alex Paxton, of the Provincial Horticultural Dept., visited with Dr. and Mrs. McEwan on Sunday.

Mr. and Mrs. Grant Parks, of Edmonton, were renewing acquaintances in town over the weekend.

Mr. and Mrs. Frank Mertzen, of Edmonton, visited with Mr. and Mrs. A. C. Fisher on Sunday.

Mr. Colin Cleghorn and daughter, of Drumheller, who have been visiting friends and relatives here, returned to their home on Sunday.

Mr. W. O. Hieland, Earl, and Mr. and Mrs. W. Waycott, Peter and John, all of Calgary, are visiting with Mr. and Mrs. Erven Rodney.

Mr. and Mrs. B. C. Lewis and son, of Winnipeg, visited with Mr. and Mrs. Ivan Weber last week while enroute for Vancouver.

Miss Laura Smith, Miss Florence Elder, Mr. Wilmer Sutherland and Mr. Lee Russell returned Sunday from a vacation trip to the coast.

Mr. A. L. Russell, who has been spending the holiday with his parents at Carriole, was in town for a few days this week.

Mr. E. V. Woodlock returned on Sunday from a two weeks' vacation at Sylvan Lake. He is now on the job at the Alberta Pacific Elevator.

Mr. A. Reiber, who has been attending summer school at the University of Alberta, returned home last week.

Mr. C. H. Adshead and family left Monday for Wynyard, B.C., where they will spend a vacation with Mrs. Adshead's parents.

Miss Jessie McCoy, who has been visiting at the Ranton cottage at South Cooking Lake, returned home last week-end.

Mr. and Mrs. A. Schwesinger and son Eric motored to Sylvan Lake on Saturday and were accompanied home by their daughter, Matilda, and Maisie Sinclair, who had been staying at the C.G.I.T. camp at the lake.

At the meeting of the Olds Town Council held in the Town Hall on Monday, Aug. 8th, the councillors were pleased to vote for a reduction of taxes, which was set at 48 mills as against 50 mills in 1931. The changes made were: a raising of the general tax from 17 to 19 mills, and a lowering of the school tax from 27 to 23 mills, making the total reduction of 2 mills. Debenture tax levy remains the same at 6 mills, also the supplementary revenue land tax is stationary at 2 mills. The rural school tax is 10 mills, the same as last year. —Olds Gazette.

School Commences Thursday, Sept. 1st

Didsbury High and Public Schools will re-open for the fall term on September 1st. All High School students should report promptly, to facilitate the arrangement of a timetable to enable them to take the units they require.

Olds Youth Loses Life In Little Red Deer

There was a drowning fatality in the Little Red Deer Sunday at the picnic grounds at Clarke's Bridge, 14 miles northwest of Olds, when Rube Bedford, aged 24, of Olds lost his life. There were many bathers and a large crowd present at the time. The water was about 7 ft deep where he drowned. Bedford crossed the river above the swimming hole to the east bank and went downstream a little way and started to swim back. Fred Dill noticed the body was not recovering for nearly 15 minutes, and attempts at bringing back life were unavailing.

Rube, who was born in Olds, has several brothers in the district. His father is living in Oregon. —

No Attempt Made To Collect Over-payment

Definite denial was made by Premier Brownlee in a statement made recently at Edmonton, of rumored plans of the Wheat Pool to collect from this year's crop certain losses sustained in previous years. The Premier's comment to the Edmonton Journal was as follows:

"I have been surprised to hear that rumors are again being circulated throughout the province with respect to the Wheat Pool, to the effect that an attempt will be made to make up the losses in connection with the 1929 crop by deductions from any crop delivered to the Pool this coming crop season."

"I wish to again state, as I did last year, that there is no truth in those reports. The agreement between the Government and the Wheat Pool, as ratified by the legislature, provides for certain fixed payments for a period of 20 years. No attempt whatever will be made to collect any sum from the various growers as individuals, but we fully expect the Pool will be able to make its annual payments out of its total earnings."

WEEKLY SERMONETTE

"Faith in tomorrow, instead of Christ, is Satan's nurse for man's perdition."

The Memorial Unveiled.

The unveiling of the Memorial at the Butte on Sunday was a very impressive ceremony and was one of the largest gatherings ever held in the district. Upwards of 1,000 people attended the service and paid tribute to the fallen heroes.

Over 100 veterans assembled at the Old Fellow's Hall, and led by the president of the local branch of the Canadian Legion, marched in a body to the Memorial. Members of the Didsbury branch of the I.O.D.E. also attended in a body.

Rev. A. J. Mitchell, Chaplain to the Legion, conducted the ceremony and offered the dedication prayer. The Memorial was unveiled by Mr. Alfred Speakman, M.P. for the Red Deer constituency, and wreaths were laid on behalf of the I.O.D.E. and Canadian Legion by Mrs. Kendrick and Mr. J. H. Lowrie.

Mr. Walter Bullard, president of the Alberta Command of the Canadian Legion, spoke to the members and complimented the splendid memorial they had erected. He reminded them that when they were discharged from the army their duty to their country did not cease. He urged them to live as good citizens and to take interest in the affairs of the country, and in so doing each would become a living memorial.

Mr. Speakman gave a short address and spoke of the events leading up to and during the War. He also spoke of the work that was being done to care for the dependents of fallen and those who were disabled during the war.

The Memorial was designed and built by the members of the local Canadian Legion, who did practically all the work in connection with it. It is built of native stone on a concrete base 14 ft. square, and is 22 ft. high, being 7 ft. square at the base and 18 inches at the top, and capped with four bronze trench helmets. On the east face is placed a beautiful bronze tablet which bears the following inscription:

"They shall not grow old, as we that are left grow old; Age shall not weary them, nor the years condemn; In the going down of the sun, and in the morning, we shall remember them."

Dedicated
To the Men of the Didsbury District
Who Fell in the Great War,
1914-1918
By
The Canadian Legion, B.E.S.L.,
Didsbury,
1932.

The memorial plot is surrounded by a cement curb, and will later be planted with flowers. A new 60ft. steel flagpole has also been erected at the north east corner.

Safe Cars And Reckless Drivers

Between six and seven o'clock on Tuesday morning is the safest hour in the week to ride in an automobile. The most dangerous hour is between five and six o'clock on Sunday afternoon. Automobile accidents happen most frequently in broad daylight, on clear days, when roads are dry. If the driver of the car is between 20 and 30 years old, the chances of an accident taking place are 81 per cent greater than if he is between 40 and 50.

These are some surprising and little known facts about automobile accidents brought out by an analysis recently completed by United States insurance statisticians. They relate, of course, to that country, but inasmuch as conditions in Canada and the United States are so similar in so many respects it is possible that we would not be far astray if, in the absence of detailed information relating to Canada, these figures were applied to this Dominion as well.

What are the causes behind the rapidly increasing hazards of motoring? In at least nine out of ten automobile accidents, the cause can be traced directly to an error made either by a driver or a pedestrian. Only once in 20 times is the machine definitely at fault. The commonest mistakes made by a driver leading to a fatality, are driving off the roadway, exceeding the speed limit for the time and place, and going ahead without having the right of way. Other important factors in accidents caused by drivers are: Reckless driving, driving on the wrong side of the road, skidding, cutting in, passing on a curve or hill, and failing to signal properly. Left turns are far more dangerous than right turns.

The "weaving driver," the "speeder," and the "road hog" are the three types of motorists who cause most highway accidents. Among pedestrians, those who cross the street in the middle of the block, walk in the direction of traffic on country roads, or step out into the street from behind parked cars are responsible for a majority of accidents in which those on foot are struck by passing autos.

In only 56,339 cases, out of 1,281,400 accidents studied, were the crashes due to mechanical failure. When the cars were at fault, defective brakes led the list as a cause. In the order named, other defects contributed to the accident toll: Lack of chains on slippery roads, blowouts and punctures, one or both headlights out, defective steering gear, glaring headlights, taillights out or obstructed.

If you ask most people under what road conditions a majority of auto accidents occur, you will probably be told: "icy roads" or "wet streets." As a matter of fact, the insurance company experts found that only three per cent of the 1931 accidents occurred on icy surfaces and less than 16 per cent on wet surfaces. In 81 per cent of all mishaps, the roads were dry. Also, 85 out of every 100 accidents resulting in deaths occurred under clear weather conditions. And most accidents happened in daylight.

When a motorist starts on a ride, if he meets with an accident, the chances that it will occur before he gets out of the driveway are one to 200. The chances of its occurring on a railroad crossing are slightly greater; of its happening on a bridge, one to 100; of its taking place on a curve, one to 25; on a state highway, one to five, and at a street crossing, one to two and one half.

What kind of drivers are most frequently in accidents: Young or old, experienced or inexperienced? Figures compiled in the survey upset some popular beliefs. For instance, they show that more than 91 per cent of all drivers involved in accidents which resulted in fatalities or injuries were experienced motorists with a year or more practice at the wheel. Overconfidence is given as a major reason for the high percentage of experienced motorists who figured in mishaps.

So far as age is concerned, the most hazardous time for automobile driving is under 20. The accident record of drivers under this age, last year, was 29 per cent worse than the average. The record of those between 20 and 39 was 29 per cent worse than the average; between 39 and 40, three per cent better than the average; between 40 and 50, 29 per cent better; and beyond 50, 36 per cent better.

While it still is a disputed point whether the increasing average speed of automobiles and the lifting of the speed limit on country roads is causing more accidents, the investigation shows undeniably that the stepping up of speed has increased the severity of accidents which they have occurred. Incidentally, too, the speeds just now set by the Royal Motor Club reflect that travelling at 15 miles a minute is three times as expensive as a motorist 45 miles an hour. The extra 15 miles an hour trebles the upkeep costs of the car.

With such facts in mind as have been established by this survey, motor car drivers should govern themselves accordingly, and by so doing may save themselves much sorrow. First, check over your car for defects which have been shown are the chief cause of accidents resulting from mechanical weaknessness. Then note the principal causes of accidents due to the driver himself, where and when they are most likely to take place, and the steps that should be taken to prevent them taking place. If an accident takes place, the responsibility is, first and foremost, your own; secondly, the driver of the other car; thirdly, the condition of your own car; fourthly, the condition of the other fellow's car. Therefore, it is up to you to prevent an accident.

A twice-daily aeroplane service is being operated between Shanghai and Nanking, China.

Troubled With Her Children Having Summer Complaint

Mrs. E. M. Montgomery, Ave. K, South, Saskatoon, Saskatchewan, mother of two children and have a great deal of trouble with them having summer complaint, in fact, several times every summer they were subject to attacks.

"I have found Dr. Fowler's Extract of Wild Strawberry to be the most effective remedy and keep it always ready to give it immediately on the first sign of any bowel complaint."

"Thanks to Dr. Fowler's I no longer dread the summer months."

Unusual Guest Of Honor Skeleton Made London University Dinner Creepy Affair

A man who died a century ago was the guest of honor at a dinner given at University College, London, England.

He was Jeremy Bentham, great philosopher and lawyer, who was one of the founders of the college.

He wore the same clothes as he did a century ago, all laced on with tape approval at the 20 distinguished professors, economists, philosophers, and lawyers who toasted him.

The article said was to celebrate the hundredth anniversary of his death. In his will he had expressed the hope that his disciples gathered together to discuss his great work, would have his skeleton in their midst.

For years the skeleton has sat on a chair in a glass case, dressed in his own clothes, with the skull at his feet, and a wax effigy of his face in its proper place.

The distinguished gathering drank to his health, and then proceeded to discuss his great ideas which have become a part of our legal and moral standards.

It was Jeremy Bentham who said: "The greatest happiness for the greatest numbers."

Seek Pirate Gold

American Salvage Experts Hope To Locate Treasure Off Delaware Caps

Pirate gold and other treasure said to have been looted from two Spanish galleons and reputed to be worth \$40,000,000 is the prize for which New York and Baltimore salvage experts are staking a small fortune.

Despite previous attempts which failed, the modern fortune hunters, equipped with deep-water diving equipment, hope to locate the English Viking "Debrake" which sank off the Delaware Capes in 1798.

Persian Balm Cool and refreshing. Soothing and protective. The perfect remedy for skin eruptions, acne and croup. Has a cooling and beautifying effect on the skin. Imparts a fresh and fragrant charm to the loveliest complexion. Banishes roughness caused by weather conditions. Safeguards the skin and keeps it smooth and soft. Always Use it for the hands and face. Always results in the highest expression of beauty.

Lighthouses Modernized

More Powerful Masthead Lights Guide Mariners On Atlantic

The virtual completion of the modernizing of the seventeen outside lightships on the Atlantic coast, whereby all were given more powerful masthead lights for the guidance of mariners, has been announced by the lighthouse service of the Department of Commerce. This program of candlepower increases is terminated by the announcement that Charleston, S.C., lightship is to have a light of 1,000,000 candlepower.

Miller's Worm Powders are of great relief from the attacks of worms in children. They are powerful in their action and, while leaving nothing to be desired as a worm expellent, are also an invigorating effect on the youthful and healthy body. Fever, biliousness, loss of appetite, sleeplessness, and other ailments that follow disorders caused by worms in the stomach and bowels.

Midget Mourned By Giant

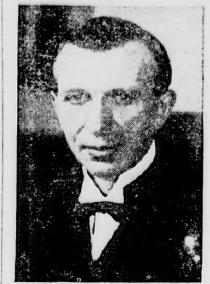

A touching friendship between Yarnie, a small March, a 7 ft. 2 in. Russian giant and Andre Suchanok, a midget, ended in tragedy when the midget, riding on his baby bicycle, collided with a motor van in London, England, and died of injuries March, a professional strong man and circus performer, was at the hospital when told that the midget had died.

Recognized us a leading specific for the destruction of worms. Mother Graves' Worm Exterminator has proved a boon to suffering children everywhere. It seldom fails.

The British royal research ship, "William Scoresby," has returned to England following an expedition to study the Humboldt current and the submarine plateau near the Falkland Islands.

A new process has been perfected to make the basic color of Portland cement tan instead of gray.

Appointed Acting President For C.N.R.

S. J. HUNGERFORD, ONE OF CANADA'S BEST KNOWN RAILROAD OPERATING OFFICERS

With the resignation of Sir Henry Thornton as Chairman and President of the Canadian National Railways, effective August 1, Mr. Hungerford, Operating Vice-President, has been appointed by the Board of Directors, as Acting President of the Company.

Samuel J. Hungerford is one of Canada's best known railroad operating officers. His experience has ranged, in more than 45 years, from the humble position of machinist's apprentice, where he commenced in 1886, to that of Vice-President in charge of Operation, Maintenance and Construction of Canada's largest rail road system, the Canadian National Railways.

Born in Bedford, Que., sixty years ago, S. J. Hungerford entered railroading as an apprentice with the Southeastern Railroad, later part of the C.P.R., at Farmham, Que. Completing his apprenticeship he worked as machinist at many points in Quebec, Ontario, and Vermont, and in 1894 was appointed Chargeeman at Windsor Street Station, Montreal. From 1897 Mr. Hungerford worked as assistant foreman, locomotive foreman and general foreman at Farmham, Megantic and McAdam Junction, and in 1901 was transferred to Cranbrook, B.C., as locomotive foreman with the Canadian Pacific. From Cranbrook, he moved in 1903 to Callander as master mechanic of the Canadian Pacific's western division, and in the following year was made superintendent of the locomotive shops at Winnipeg, becoming in 1908 superintendent of shops.

In 1910, Mr. Hungerford joined the Canadian Northern Railway, as superintendent of rolling stock with headquarters at Winnipeg, and in 1913 he moved to Toronto in the same position. In 1917 Mr. Hungerford became general manager of the Eastern Lines, Canadian Northern Railway, and in the following year was named Superintendent of the lines, and the following year was named Assistant Vice-President, Operating, Maintenance and Construction Departments of the Canadian National and Grand Trunk Pacific Railways and two years later, in October, 1922, he was made Vice-President and General Manager of the Eastern Lines, with headquarters at Toronto, in which position he continued until his appointment, in February, 1923, as Vice-President in charge of Operation, Maintenance and Construction of the Canadian National System, with headquarters at Montreal.

Railroad conditions have altered very since the days when S. J. Hungerford commenced his work as an apprentice at Farmham in 1886. Then, in addition to locomotives, 400-ft. tall oil tanks were copied by the "ink and paint" and airbrakes were unknown. Hours of work were long and pay was small, and apprentice training systems were not brought to the stage where they are today when every effort is made to educate and encourage the boys to learn while they earn and fit themselves for better jobs.

Locomotives of 1886 were "puffies" as compared with the 6100, 4100 and the 5700 classes of engines used today, on the Canadian National System, and the trains they hauled were more toys compared with the huge freight loads and all-steel passenger

trains which are now operated. Practices of handling locomotives in shops and on the road have altered with the growth in size of locomotives which have had to be "shopped" and many of the improvements in shop practices in Canada have developed under the watchful eye of S. J. Hungerford, who has always had the admiration of those who worked with him because he knew every phase of the work so thoroughly himself.

Predicts Building Boom

Canada and United States Are Set For Construction Work

Canada and the United States are all set for a building boom, according to the National Association of Real Estate Boards.

Commenting on a survey made in the two countries an association report says only a slight improvement in business conditions is required to release a large amount of building construction.

Ten per cent of 355 cities surveyed in Canada and the United States report a shortage in homes, the report adds.

Asthma. Overcome. The triumph over asthma has assuredly come. Dr. J. D. Kellogg's Asthma Remedy has proved the most positive blessing the victim of asthmatic attacks has ever known. It is a simple, safe and pleasant remedy which leaves no room for doubt; that here is a real remedy. Get it today from your dealer.

Cure For Hay Fever

Illinois Physician Advises Patients To Go To Hudson Bay District

If you are troubled with hay fever go up to the Hudson Bay District or even further north, is the advice of the University of Illinois College of Medicine.

Reporting on the research into this summer ailment, which the college is conducting with 24 men and 24 women, Dr. Clarence A. Johnson said the only way to escape is "go to the north, where there isn't any ragweed—say around the Hudson Bay District."

Sores. Fix Before It. There are many who have been afflicted with sores and have driven them away with Dr. Thomas' Electric Oil. All similarly troubled should lose no time in applying this wonderful remedy, as the oil is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

An invisible, colorless, protective coating for silver and other metals, which preserves their surface without paint or lacquer, has been invented by a German chemist.

Heal your horse while it works. Apply Douglas' Egyptian Liniment to sore necks and galls. A sure, speedy treatment.

Tramp: "Won't you give a little something to an old hero of the battlefield? I have survived four wars."

Stranger (handing him money): "How did you do it?"

Tramp: "Kept out of 'em."

Lakes And Rivers Of Canada Offer Means Of Providing Enjoyable Trips By Canoe

The requirements for a successful and satisfactory trip by canoe; suitable water, picturesque country and an excellent summer climate, can be found almost anywhere in Canada. The innumerable lakes and rivers make the choice of trips almost unlimited. One can travel for hundreds of miles on any of the great rivers, journeying from lake to lake and portaging where rapids impede or heights intervene. Having decided upon the kind of trip to be made, whether one requiring much effort and experience, or one quite free from rapids and portages, the canoeist has only to select his route.

Although railways and the automobile have provided a means of rapid "Ulysses-ETA" S.H.R. C.M.P. V.E. V.B. transport, there are countless places in the quiet of the forest, out of reach of either. It is such places, approachable only by canoe, that invite the adventurer to partake of the wonders of nature. The railways and the development of good roads have, however, made the majority of canoe routes in Canada easily accessible, and one need not travel far from the majority of Canadian cities before reaching the embarking point of an enjoyable trip.

In certain parts one may follow the streams for a long summer outing and never see a village or dwelling, yet civilization lies so close that return is easily possible. Waterfalls, rapids large and small, lakes of singular beauty hidden deep in the forest, and islands covered with pine and spruce trees are among the interesting features encountered en route. In some places one may travel hundreds of miles without meeting obstacles of any kind.

There is a remarkable contrast between the conventionality of modern life and the full naturalness of life in the great forest, where one may relax, amid the beauty of natural surroundings. A strange appeal of imagination comes to one while following the routes of the historic explorers and contentment prevails amid the constant change of beautiful scenery.

Canadian lakes and rivers are renowned for the variety and abundance of their fish. Brook and lake trout are numerous, the latter often weighing from fifteen to thirty pounds; while other species of fish are plentiful. Eastern Canada is well provided with waterways, well suited to travel by canoe. Canal systems, rivers large and small, rapids, falls, lakes, stillwaters and all the requirements for an enjoyable canoe trip, await the devotee of the paddle. Whether it be a cruise through a well settled region, or an adventurous journey through the wilderness, the canoeist will find an almost unlimited number of lakes and streams.

The waterways of western Canada, in days gone by, assisted materially in unveiling the mystery of the great country between Lake Superior and the Pacific Ocean. Radiating from Lake Winnipeg, are routes of romantic interest. Nestling among the mountains of the coast are many beautiful lakes, also streams that wind through the hills, where sport for the angler and hunter may be found.

The National Development Bureau of the Department of the Interior at Ottawa, has prepared a series of four

booklets entitled "Canoe Trips," copies of which may be had by our readers, free of charge. The series covers the Maritime Provinces, Quebec, Ontario and Western Canada. Further detailed information is available to those who require specific data on any particular trip.

Newspaper Advertising

The Popular Medium Of Publicity Used By The Major Industries

Major industries continue to show a preference for newspaper advertising over that of other media, the American Newspaper Publishers' Association reported at New York.

The association's bureau of advertising announced the results of a survey showed 435 national advertisers spent \$113,365,000 in newspaper advertising last year. Magazine space was used by 190 of these firms to the extent of \$78,317,813, and 121 used radio broadcasts entailing an expenditure of \$21,223,862. The bureau reported that newspapers were the favored medium in 25 of the 32 industrial groups represented.

Motorists Prefer Blue

Black is declining as the favored finish for automobiles, giving way to blue, it was revealed by the latest color index of leading automobile manufacturers in Detroit. Blue predominated in June among all cars sold, the figures indicated.

The central insect parasite breeding and distributing laboratory for the British Empire is located at Farnham Royal, England.

"Please, madam, the pipe has burst and the kitchen is full of water!"

Not Always a Sailor

Columbus Got Taste Of Sea From Father-In-Law

The Portuguese Islands, of which Madeira is the chief, have a charm of their own. Not all have recalled that Christopher Columbus followed a girl to this island home. She was Menina Ferreiro, whom he had met at her school in Portugal. He married her in 1473, making his home first at Porto Santo and then at Funchal. His father-in-law was a mariner, and with him Christopher got some of his taste of the sea. In 1488 wretched sailors drifted into Funchal and their pilot before he died gave Columbus his charts and papers. It was studying these that gave Columbus his ideas of an unknown land in the West.

Gas Pressure Dropping

Tests Made At Turner Valley Give Some Cause For Uneasiness

Tests made by the Turner Valley Gas Conservation Board reveals the gas pressure in Turner Valley fields is dropping quickly. The tests are being made with a view to curtailing gas production in an effort to prolong the field's life.

Compared with the situation 11 months ago, the tests show, there has been a reduction in gas pressure by nearly 200 pounds per square inch in the north and central parts of Turner Valley. If rigid conservation is not enforced, the board maintains, wells in this area will be unable to supply gas to Calgary under their own pressure in less than three years.

Portrait Partly Tailored

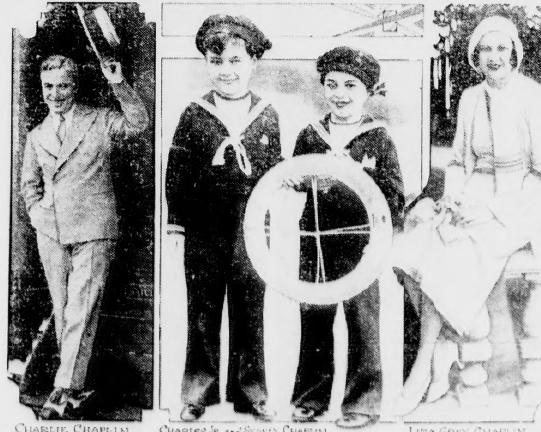

Artist Forgot Buttonholes and They Were Worked In

Should the portraiture of President A. Lawrence Lowell of Harvard University ever decide its coat should be buttoned, buttonholes now have been provided. An observer of Harvard students living in Lowell Hall where the large portrait hung for a year discovered that the artist painted two buttons on the suit, but forgot the buttonholes. But that has been "repaired" by the addition of two finely tailored buttonholes.

A wise-cracker down our way says a grass widow is a woman who stays home and cuts the lawn while her husband plays golf.

Soviet Russian talking pictures have been drawing large audiences of Russians in Harbin, Manchuria.

WILL YOUNG CHAPLINS OUTSHINE FAMOUS DAD?

Recently signed on a two-year contract to make five pictures, the children of Charlie Chaplin and Lila Grey Chaplin, his former wife, will shortly make their debut before the cameras and klieg lights of Hollywood, taking their first step in the career that brought their father world renown. The boys, Charles Jr. and Sidney, are still too young to have any definite ambitions as to the type of roles they would like to play, but their mother says they will not make any attempt to mimic the style of comedy of which their dad is the great exponent. Chaplin himself is said to be displeased at his children's attempt to attain a place in the Hollywood firmament.

Sessions of the Imperial Economic Conference in Ottawa brought into relief outstanding facts about Canada's present standing in the empire and the world. Here are a few, prepared by the Department of Trade and Commerce.

Canada with an area of 3,690,643 square miles is the largest country within the empire and comprises 27 per cent. of the empire's total area of 13,191,677 square miles.

Canada leads the world in the production of newspaper nickel and asbestos; holds second place in the production of gold, platinum metals and cobalt; third in the production of zinc and silver and fourth in the production of copper, wheat, automobiles and lead.

Canada leads the world in the export of wheat, newsprint, nickel and asbestos; holds third place in the export of wheat flour; fourth place in the export of automobiles and wood pulp and fifth place in the export of rubber tires. She ranks high also in the export of a wide variety of other products.

Canada stands seventh among the trading nations of the world, and only second to Great Britain among empire countries.

Canada trades with over 100 different countries, of which over 32 are within the British Empire.

Canada has provided approximately one-third of the total supply of world wheat entering into international trade during the past two months.

Canada stands second in per capita consumption of developed hydro power.

Canada's fisheries are among the most extensive in the world.

Canada is recognized by the League of Nations as one of the eight leading manufacturing nations of the world.

Canada's chief eastern port of Montreal is the largest inland port of the world.

Canada's eastern ports are closer to Britain and northern Europe than any other port of the western hemisphere, and her Pacific ports are from one to four days closer to Japan than are any other ports on this continent.

Canada comes second in total mileage of steam railways among the countries of the world.

Canada stands fourth among countries in the number of motor vehicles in use, and comes second in per capita ownership, or approximately one to every eight persons.

Canada is only exceeded by one country in the proportion of telephones in use and the number of calls.

Warrant Of Appointment

Given To Firms Supplying Goods To Royal Household

The use of the Royal Arms and the words "By Appointment" is a privilege to those firms which supply goods to a Royal household. No one else may use them. Actually, the firms to supply goods are selected by the Master of the Household in a Royal palace, and each receives a Warrant of Appointment. These warrant holders have a special society of their own to safeguard the privileges they enjoy, and they hold an annual banquet.

A geologist of the Field Museum says: "The quantity of gold present in the crust of the earth has been estimated as one-half of one-millionth of one per cent., yet gold is not included among the really rare elements."

"This photograph makes me look ten years older."
"Then you won't need to have another photo taken for ten years." — Kurt Henn, Stockholm.

A "New Way" harvester has been demonstrated on a farm near Winnipeg. Among the saving features claimed for the machine are the elimination of twin steaming, the picking up of all heads and saving the quality of straw; a power take-off, enabling speedy disposal of harvest at one stroke, and saving of time and labor. The machine stacks the grain, and in case of wet weather these stacks can be speedily removed. It handles any kind of crop.

* * *

Canada's wheat crop of 1927 is likely to be harvested from about 25,160,000 acres, of which 25,526,000 acres are in Manitoba, 14,157,000 acres in Saskatchewan and 7,728,000 in Alberta. 704,000 acres are distributed throughout the other provinces. The Orient is increasing as a consumer of wheat. China having imported 50,000,000 bushels, the largest in the history of that country. Australia spent 65.3% and United States 18% and Canada 14.5%.

* * *

Whatever may be the disposition of a young animal recently born in Australia, Australian parents remain staunchly Canadian. The parents were presented to Adelaide by the Canadian Government and made the 10,000 miles voyage aboard the freighter, Canadian Constructor. Biologists have shown a keen interest in the fact that the parent animals though they have already lived two years in Australia, continue to bear a heavy coat during what is the Canadian winter and the Australian summer. Apparently, heredity has spared over environment. It is anticipated that the young buffalo will change coats by the calendar, rather than by local weather conditions. The young calf's parents were formerly of Wainwright Buffalo Park, Alberta.

* * *

Canadian Thistle Control.

The Canadian thistle has a low percentage of germination generally, but suppose 35% germinates. A flower will average from 60 to 75 seeds, and a plant with produce, from 20 to 30 flowers. At a very low estimate 110 seeds will grow just thick what we are producing and the amount of labor required to eradicate of this menace.

We find them in our fields, where here were none last year, one here and a couple little further on. That is how the plants show up, and if not cared for will soon be in bunches grouped together.

Let us try to prevent the spread of the Canadian thistle by cutting off that are now in our fields and pastures, also on the fence lines and road allowances, so that none are allowed to go to seed.

Let us endeavor with all our power to control and destroy this increasing menace to our farming industry.

P. G. JOHNSTON,
Weed Inspector.

Two local young business men were playing golf the other day. One, acting as caddie, placed the ball in position for his friend, who had just taken up golf. He made a mighty swipe, and a large lump of teeing ground hit the other player, his hardware friend in the mouth.

"Hey," said the injured player, "though you are a grocer, you're not supposed to put the tee in the caddie."

WORLD HAPPENINGS BRIEFLY TOLD

The gas pressure in Turner Valley field is dropping quickly, tests show.

Rumors are current that negotiations for the release of Mahatma Ghandi are under way.

Foreign grown potatoes imported into Britain will be subjected to a duty of £1 a ton.

Sir Richard Threlfall, chemist and engineer, who rendered valuable services to the Allies during the World War, died at Edgbaston, England.

The Prince of Wales said that he believed this year would witness the first move toward the world's return to better times.

At an Essex Girl Guides' rally at Thornton Park, Brentwood, the prince royal presented a bronze medal to Eva Mitchell, aged 11, who rescued her baby sister from drowning.

When Mrs. M. Stansall, aged 102, recently made her first flight at Mansfield, England, she insisted that her pilot, Sir Alan Cobham, the famous aviator, loop the loop.

The Chinese Government has placed a £40,000 order with Marconi's Wireless Telegraph Company, Limited, for apparatus for a new beam wireless station, near Shanghai, capable of broadcasting also.

Quoting an 1853 statute which excluded the legal profession from arrest while going to and from court, S. L. August, Chicago attorney, was dismissed in court when charged with speeding 51 miles an hour.

Young Britons won't have to withdraw brows any more learning the names of all the English kings. A thoughtful manufacturer has provided them with a pocket knife with the names engraved on the handle.

The telephone service between Great Britain and Egypt was inaugurated by a conversation between Mr. Baldwin, speaking in the Prime Minister's room in the House of Commons, and Sidky Fasha, Premier of Egypt.

Some Memory Experts

Both Women and Men Have Done Remarkable Work

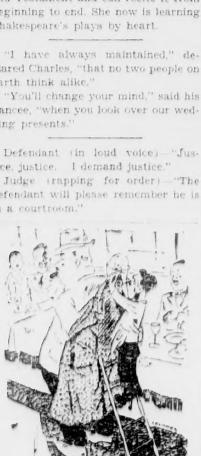

There was once a mathematical wizard, a young chap who was rather stupid in other respects, but could stand beside a railroad track while a long freight train was passing by, jot down in his brain the numbers of every box car, and after the train had passed recite the long list of five and six cipher numbers without one error. Memory experts have done some remarkable work in memorizing whole books, long legal instruments, and other literature. In the case of military spies it is often necessary for them to memorize secret orders so that they cannot be caught with written evidence on their persons. A Miss Bessy Neumann has memorized the Old Testament and can recite it from beginning to end. She now is learning Shakespeare's plays by heart.

"I have always maintained," declared Charles, "that no two people on earth think alike."

"You'll change your mind," said his fiancee, "when you look over our wedded presents."

Defendant (in loud voice) — "Justice, justice, I demand justice."

Judge (lapping for order) — "The defendant will please remember he is in a courtroom."

Button's first day — Muskete, Vienna

W. N. U. 1953

Contract Bridge

By Hamlin B. Hatch, Cavendish Club, Toronto

Defensive Tactics

In my previous article a general outline was given of the bidding card and distributional strength necessary for the overcalling hand to hold when making a defensive overall. It was shown that, when vulnerable, the overcaller must have a stronger hand both in high cards and in taking tricks in the suit bid, than when not vulnerable. Also that, when a bid of two is necessary to overcall, the hand overcalling must be considerably stronger especially when vulnerable. What I will try to show today is how far it is good bridge to carry defensive bidding.

This must be analyzed by an analysis of the invisible side of the score sheet. An average contract rubber may be said to average one thousand points profit to the winners. This one thousand points for the purpose of this analysis, is divided into four hundred points and six hundred points. The first four hundred points represents the concealed or invisible value of the first game of the rubber. The six hundred points represents the concealed or invisible value of the final game of the rubber. If then, a first game of a rubber is worth four hundred points it follows that defense which stops a sure first game at a cost of four hundred points, is good defense. Notwithstanding the hard fact, that the defense partnership has against them in the honor column a definite four hundred points. Still if the incurring of this four hundred point penalty stopped game by the adversaries, the defense players have really broken even. If, however, after the deal is completed and the four hundred point penalty has been incurred, it is found that the opponents could not have made game, then the penalty incurred is a total loss, to the penalty incurrer. It follows then, that defense bidding must be predicated on two basic factors:

First. It is certain that the opponents can make their contract. If it is best, rather than overbid and take a penalty, to allow the opponents to play the hand with the hope of defeating them. If it is certain that the opponents can make their contract, then the defender must know how large a penalty he is going to incur, and that knowledge constitutes the second basic factor.

It is necessary for the overbidding side to closely approximate, through their knowledge of their combined holdings, together with a knowledge of the combined holdings of the adversaries, the number of tricks they will take when playing the defensive contract. It is assumed always in this discussion that the defender's contract has been doubled.

The following table shows the penalties which are allowable to defenders in order to save game.

To save first game, the defenders may be set three tricks doubled. If the contract is set less than three tricks, the defenders show a profit. If set more than three tricks the defenders show a loss.

To save second game, when the defenders are not vulnerable, a set of four tricks doubled may be taken. If the set is less than four tricks, the defenders show a profit, if more than four tricks a loss.

To save rubber game, a set of two tricks doubled may be taken. If less than two tricks the defenders show a profit, if more than two tricks a loss.

Defense Against Partial Scores

About one game in four on the average is made by a side having a partial score. It follows then that a partial score is worth one quarter of the game score premium, plus the partial score itself. This gives an invisible value to any partial score of between one hundred and fifty and two hundred points. The factor of safety in defense overbidding to save partial scores is very small and it takes very close figuring by the defenders to successfully defend against partial score contracts. As a rule, the most expert bridge player is at a disadvantage when trying to figure whether he is going to be set two or three tricks. If to save partial score he is set three tricks doubled, unvulnerable, he has suffered a big loss. If he is set two tricks doubled he has broken even, and if he is set one trick doubled he has made a profit.

Home economics specialists point out that washing fine china with too hot water increased the possibility of its chipping.

To sum up then, defensive over-

bidding is a very important factor in Contract, but its use must be predicated on precise card valuation methods, and also an ability by the player to estimate closely the losing tricks in the combined hands, if the contract is played in the overbid.

Memorial For Adventurers

Danes and Norwegians Plan To Erect Cairn At Churchill

Danes and Norwegians of the Lutheran faith, are planning to erect a memorial cairn at Churchill to the memory of Captain Jens Munck and his party of 66 adventurers who founded "Winterhaven" on the shores of Hudson Bay in 1619. Announcement was made to this effect at Winnipeg recently by Rev. B. M. Hefren, rector of Pine Creek, Minn.

Munck was sent out by King Christian IV of Denmark and Norway in 1619. With the party was Chaplain Rasmus Jensen Aarhus, first Lutheran pastor to set foot in America. Along with 60 of the party, the pastor died of disease during the terrible winter of 1620, leaving Captain Munck and two men the survivors of the ill-fated expedition.

Sport and Adventure In Northeastern Manitoba

Following the Historic Canoe Routes Of the Pioneer Traders

A section of Canada which has recently attracted attention is northeastern Manitoba where gold was discovered last fall in the vicinity of Island Lake. For years this territory was little prospected although rich finds were made in the Red Lake section of Ontario to the east, and in the Herb and Flin Flon Lake sections to the west. The usual means of entry to this section in summer is by way of Norway House at the head of Lake of Winnipeg, which is reached by comfortable steamer from Selkirk on the Red River, twenty-three miles north of Winnipeg. Here at Norway House will be found a combination of the medieval and modern, and the traveler may rest in the shade of the old trading post conducted by the Hudson's Bay Company while contemplating the activity around the Indian boarding school, the wireless station and the air bases located at this point.

Norway House, where there is a good summer hotel with accommodation for seventy-five guests, is the distributing point for four outposts, namely: Island Lake, God's Lake, Oxford House and Cross Lake, at each of which will be found the usual trading posts, traders, trappers and Indians. It is in the territory served by these outposts that the angler will find the best fishing.

The tourist sportsman will find this a delightful country as the network of waterways, well fringed with timber, provide an easy means of travel. Good canoemen and boats may be engaged at Norway House and picturesque canoe routes lead north to Cross Lake and northward to the Nelson River, God's Lake and Island Lake, the latter a two hundred mile cruise. The maze of waterways include some of the oldest and most historic canoe routes of the pioneer traders and trappers plying between Norway House and York Factory on Hudson Bay.

Good fishing may be had in practically all the lakes and streams in the district and the angler in search of trout is assured of exceptionally fine sport as hundreds of lakes contain lake trout of a very large size, ranging up to fifteen pounds in weight being common. Some of the better known waters for the species include Cross, Nelson, Oxford, Island and God's Lake, although scores of the lesser known waters will, no doubt, furnish equally good sport.

Many anglers are unaware that speckled trout are to be found in Manitoba waters and it will be a pleasant surprise to find these gamy fighters in abundance and of an exceptionally large size in these northern waters. The wealth of the smaller streams is unknown, but in many of the waters comprising the well known canoe routes specimens ranging from four to five pounds have been taken.

Where Silence Rules

No Word Is Ever Spoken In German Monastery

In the broad orchards of the monastery of Marawald, in the Eifel, Germany, the only sounds are the sighing of the winds in the trees and the songs of the birds. The monks who prune the trees and pluck the fruit are silent. Theirs is the strictest Catholic order of penitents in the world. From about to lay brother these monks work for a living, always in complete silence. Their food is simple, and their monastic garb may be changed only every eight days. All of the inmates of the monastery sleep together on plain boards in one room.

Michigan Shop Sells Bait

Lake fishermen at Pontiac, Michigan, may obtain bait at "Ye Old Worm Shoppe," a stand located near one of Oakland County's most popular fishing resorts. "Clerks" at the "Shoppe" sell worms at six dozen for 25 cents.

Gus: I'll have you understand there's good blood in my family.

Gulliver: Yes, and how much did they pay for the transusions?

Home economics specialists point out that washing fine china with too hot water increased the possibility of its chipping.

Canada Exporting Less Wool

Manufacturers Are Using More Of Home Grown Product

"Three times as much Canadian-produced wool was bought last year by the Canadian industry as was exported," said Major Douglas Hullam, Secretary of the Canadian Woollen and Knit Goods Manufacturers Association, speaking in Toronto. The use of Canadian wool is steadily increasing, due to improved merchandising methods adopted by sellers, the 36% increase in yards of woolen cloth woven in Canada, and the duty placed on Argentine wool."

"In a report issued through the National Research Foundation the methods by which Canadian wool gets to market are outlined. Abattoirs buy live lambs and sheep, the wool is marketed as pulled wool, and over 80% of such wool is bought by Canadian manufacturers. Seventy woolen and knitting mills bought wool direct from farmers. One hundred and eight firms listed as wool dealers of co-operative associations handled Canadian wool for re-sale. Approximately five million lbs. of the clip was used in home industries."

This Burglar Alarm Works

Sounds Siren, Explodes a Bomb and Imprisons Thief

The smash-and-grab jewel thief, who has infested England for the past few months, has met his equal in science.

Neither the vigilance of the police, nor the precautions of jewellers have succeeded in diminishing the number of these brazen robberies. But it will take the best criminal brains in the world to carry on in the face of a new precautionary invention.

A demonstration of the invention was made before jewellers at Southend-on-Sea. A jeweller turned himself into a robber for the purpose of the demonstration.

A hole large enough for a man to pass through was made in a jewelry shop by smashing it with a blackjack. Then a number of metronomic things happened.

First a deafening siren went off which could be heard for three-quarters of a mile around. A gas bomb exploded, followed by a smoke bomb which cast a screen about the jewels and blinded the raider.

As though these were not enough a secret steel panel snapped across the window, imprisoning the raider and protecting the jewels.

Brain Controls Fast Or Slow Reading

Average Speed Is Around Six Words Per Second

Six words per second, or about four and one-half hours for a standard size book is good average reading speed, and most people can aspire to reach this seemingly extraordinary rapidity. It is the brain, not the eye, which determines the speed of reading. The eye cannot move steadily, but must move in a series of jerks, with pauses between. These pauses are needed to see the printed page clearly, but still more to give time for the meaning to be grasped.

Four women and two men, who started from Melbourne, Australia, by automobile six months ago, have arrived at Dover, England, after having motorized 12,000 miles of their tour overseas.

Science has figured that the earth travels 534,600,000 miles on its annual trip around the sun, and that more than 1,601,000 miles are traveled by the globe every day.

"I can't engage you. I haven't enough work for the men I have."

"That does not matter. Very little work would keep me going."

Vart Hem, Stockholm

THE HOUSE OF DREAMS-COME-TRUE

—BY—
MARGARET PEDLER

Author Of
"The Splendid Valley," "The Hermit
Hodder & Stoughton, Ltd., London

CHAPTER XXVII.—Continued.

But she had courage enough to face the consequences of that refusal, to stand up to the clutter of poisonous tongues that must ensue, and trust enough to bank on the loyalty of her real friends, knowing it would be the same splendid loyalty that she herself would have given to any one of them in like circumstances. For Jean was a woman who won more than mere lip-service from those who called themselves her friends.

Burke had never been more mistaken in his calculations than when he counted upon forcing her hand by the mere fear of scandal. But none the less he held her—and held her in the meshes of a far stronger and more binding net, had he but realized it.

Looking back upon the episode from which her present predicament had actually sprung, Jean could almost have found it in her heart to smile at the relative importance which at the time, that same incident had assumed in her eyes.

It had seemed to her, then, that for Blaise ever to hear that she had been locked in a room with Burke, had spent an uncounted hour or so with him at the "honeymooners" inn, would be the uttermost calamity that could befall her.

He would never believe that it had been by no will of hers—so she had thought at the time—and that fierce lover's jealousy which had been the origin of their quarrel, and of all the subsequent mutual misunderstandings and aloofness, would be roused to fresh life, and his distrust of her become something infinitely more difficult to combat.

But compared with the present situation which confronted her, the happenings of that past day faded into insignificance. She stood, now, face to face with a choice such as surely few women had been forced to make.

Whichever way she decided, whichever of the two alternatives she accepted, her happiness must pay the price. Nothing she could ever say or do, afterwards, would set her right in the eyes of the man whose belief in her meant everything. Whether she agreed to marry Burke, returning home in the odour of sanctity within the next hour or two, or whether she refused and returned the next morning—free, but with the incontrovertible fact of a night spent at Burke's bungalow, alone with him, behind her, Blaise would never trust or believe in her love for him again.

And if she promised to marry Burke and so save her reputation, it must automatically mean the end of everything between herself and the man she loved—the dropping of an iron curtain compared with which the wall built up of their past seemed something as trifling and as easily demolished as a card house.

On the other hand, if she risked her

good name and kept her freedom, she would be equally as cut off from him. Not that she feared that Blaise would take the blackest view of the affair—she was sure that he believed in her enough not to misjudge her as the world might do—but he would inevitably think that she had deliberately chosen to spend an afternoon on the Moor alone with Burke—"playing with fire" exactly as he had warned her not to, and getting her fingers burnt in consequence—and he would accept it as a sheer denial of the silent pledge of love understood which bound them together.

He would never trust her again—not forgive her. No man could. Love's Loyalty, rocked by the swift currents of jealousy and passion, is not of the same quality as the steady loyalty of friendship—that calm, unsakable confidence which may exist between man and man or woman and woman. Moreover—and here alone was where the fear of gossip troubled her—even if the inconceivable happened and Blaise forgave and trusted her again, she could not go to him with a stammer name, give him herself—when the gift was outwardly tarnished. The Tormarin pride was unyielding as a rock—and Tormarin women had always been above suspicion. She could not break the tradition of an old name—do that disservice to the man she loved! No, if she could find no way out of the web in which she had been caught she was set as far apart from Burke as though they had never met.

The girl was torn. She could not break the tradition of an old name—do that disservice to the man she loved! No, if she could find no way out of the web in which she had been caught she was set as far apart from Burke as though they had never met. The only agony of meeting and remembrance would be with her for the rest of her life!

Jean envisaged very clearly the perils that lay ahead—envisioned them with a breathless, torturing perception of their imminence. It was to be a fight—here and now—for the whole happiness that life might hold.

She turned to Burke breaking at last the long silence which had descended upon them.

"And what do you suppose I feel towards you, Geoffrey? Will you be content to have your wife think of you—as I must think?"

A faint shadow flitted across his face. The quiet sound of her words—underlying significance—flicked him on the raw.

"I'll be content to have you as my wife—at any price," he said stubbornly. "Jean"—a sudden urgency in his tones—"try to believe I hate all this as much as you do. When you're my wife, I'll spend my life in teaching you to forget it—in wiping the very memory of today out of your mind."

"I shall never forget it!" she said slowly. Then bitterly: "I wonder why you even offer me a choice—when you know that it is really no choice."

"Why? Because I swore to you that you should give me what I want—that I wouldn't take even a kiss from you again by force. But"—unevenly—"I didn't know what it meant the waiting!"

Outside, the mist had thickened into fog, curtaining the windows. The light had dimmed to a queer, glimmering dusk, changing the values of things, and out of the shifting shadows her white face, with its scarred line of scornful mouth, gleamed at her—evasive, tantalising as a flower that sways out of reach. In the uncertain half-light which struggled in through the dimmed windowpanes there was something provocative, maddening—a kind of etherealized lure of the sensuous in the wavering, shadowed loveliness of her. The man's pulses leaped; something within him slipped its leash.

"Kiss me!" he demanded harshly. "Don't keep me waiting any longer. Give me your lips . . . now . . . now . . ."

She sprang aside from him, warding him off. Her eyes stared at him out of her white face.

"You promised!" she cried, her voice sharp with fear. "You promised!"

The tension of the next moment strained her nerves to breaking point. Then he felt back. Slowly his arms dropped to his sides without touching her, his hands clutching with the effort that it cost him.

"You're right," he said, breathing quickly. "I promised. I'll keep my promise." Then venomously: "Jean, why won't you let me take you home? I could put the car right in ten minutes. Come home!"

There was unmistakable appeal in his tones. It was obvious he hated the

Blended and Cut FOR PIPES ONLY OGDEN'S CUT PLUG

If you "roll your own," use Ogden's fine cut cigarette tobacco.

task to which he had set himself, although he had no intention of yielding.

She stared at him doubtfully.

"Will you? Will you take me home, Geoffrey? . . . Or—bitterly—"Is this only another trap?"

"I'll take you home—at once, now—if you'll promise to be my wife. Jean, it's better than waiting till tomorrow—till circumstances force you into it!" he urged.

She was silent, thinking rapidly.

That sudden break in Burke's control, when for a moment she had feared his promise would not hold him, had warned her to put an end to the scene—if only temporarily—as quickly as possible.

"You are very trusting," she said, forcing herself to speak lightly. "How do you know that I shall give you the pledge you ask merely in order to get home—and then decline to keep it? I think—reflectively—"I should be quite justified in the circumstances."

She smiled a little and shook his head.

"No," he said quietly. "I'm not afraid of that. If you give me your word, I know you'll keep it. You wouldn't be—you—if you could do otherwise."

For a moment Jean was tempted, fiercely tempted to take his blind belief in her and use it to extricate herself from the position into which he had thrust her. As she herself had said, the circumstances were such as almost to justify her. Yet something within her, something that was an integral part of her whole nature, rebelled against the idea of giving a promise which, from the moment that she made it, she would have no smallest intention of keeping. It would be like the breaking of a prisoner's given parole—equally mean and dishonourable.

With a little mental shrug she dismissed the idea and the brief temptation. She must find some other way, some other road to safety. If only he would leave her alone, leave her just long enough for her to make a rush for it—out of the house into that wild, wilderness of mist-wrapped moor!

It would be a virtually hopeless task to find her way to any village or to the farmstead, three miles away, of which Burke had spoken. She knew that. Even moor-wise folk not infrequently entirely lost their bearings in a Dartmoor mist, and, as far as she herself was concerned, she had not the remotest idea in which direction the nearest habitation lay. It would be a hazardous experiment—fraught with danger. But danger was preferable to the dreadful safety of the bungalow.

In a brief space, stung to swift decision by that tensed moment when Burke's self-mastery had given way, she had made up her mind to risk the open moor. But for that she must somehow contrive to be left alone.

He exhaled remorsefully. "Look here, we'll have supper. There are some chops in the larder. We'll cook them together—and then you'll see what a really domesticated husband I shall make!"

He spoke with a new gaiety, as though he felt very sure of her ultimate decision and glad that the strain of the struggle of opposing wills was past.

"Chops? How heavenly! I'm afraid—apologetically—"it's very unromantic of me, Geoffrey!"

He laughed and, striking a match, lit the lamp.

"Distinguishingly so! But there are moments for romance and moments for chops. And this is distinctly the moment for chops. Come along and help me cook 'em."

He massed a keen glance at her face as the sudden lamplight dispelled the shadow of the room. But there was nothing in it to contradict the insouciance of her speech. Her cheeks were a little flushed and her eyes very bright, but her soul was quite natural and unforced. Burke reflected that women were queer, unfathomable creatures. They would fight you to the last ditch and then suddenly succumb, probably hating you in se-

cret all the better for having mastered them.

He had forgotten that he was dealing with a daughter of Jacqueline Mavor. The only actress that was Jean's mother came out in her now, called up from some hidden fountain of inherited knowledge to meet the imperative need of the moment.

(To Be Continued.)

Rural and Urban Residents

Of the population of Canada 46.3 per cent are rural dwellers and 53.7 per cent reside in urban centres. Ten years ago the proportions were 50.5 per cent rural and 49.5 per cent urban. The largest proportion of rural population is found in Prince Edward Island, where the country residents represent 76.8 per cent.

The Egyptians were among the world's great archers, using the bow as their main weapon in fighting.

DEFINITE HELP FOR DWELLERS IN APARTMENTS

Odorless way to cook fish, cauliflower and cabbage

CANAPAR IS A PRODUCT OF HAMILTON FIRM

Lives there a woman, in apartment, duplex or house, who has not at some time, or other, suffered from the fish, cabbage, or cauliflower, because of the odors they give off when being cooked? Or who has not suffered from other people close by who have the same trouble?

Canpar entirely does away with this annoyance. More than that, it actually improves flavor and food value. Cooking in Canpar parallels the famous French method of cooking, in removing food and its flavours to the closed casseroles. Canpar comes in large sheets, in a handy size package. When boiling vegetables you simply cover the sheet of Canpar and make a big potful of them. If you are steaming them you line your steamer with Canpar, arrange food and seasoning, and fold back corners of the Canpar to prevent steam from dripping back.

Baked or steamed fish is particularly delicious done this way. No fishy odor in the kitchen, no greasy kettle to clean. What's more, no mess to clean up with Canpar. It prevents the fats and juices from burning, and eliminates scorching of the pan afterwards.

Canpar saves fuel. You can cook three vegetable casseroles in the same saucepan with it, without intermingling of flavors. And it is very economical. Just rinse it, dry it, and after using it, hang it up to dry again.

Lots of women use Canpar for a dish cloth—it is so silky and satisfactory and it doesn't shrink. And it is so good—use it to wrap up the meat when you're roasting it, or when you're baking it. If you are steaming them you line your steamer with Canpar, arrange food and seasoning, and fold back corners of the Canpar to prevent steam from dripping back.

Melvin Notes

Don't forget the barn dance at August Krebs', Friday, August 19.

Anyone wanting information here as to fish, just ask Orvin and Ace.

Mr. and Mrs. Lewis Wills and son, of California, are visiting with Mrs. Wills' sister, Mrs. Glen Johnston.

Mr. and Mrs. Clarence Rhinehart and family spent Sunday with Mr. and Mrs. George Young.

Mrs. Ace Ester and son Kenneth are spending the week with Mrs. Lloyd Chandler.

Miss Maud Vernon, of Calgary is visiting at the home of Mrs. Ben Krueger.

Mrs. Carlson and Miss Gladys Carlson are spending the week at Sylvan Lake.

Mr. and Mrs. Gale, of Sunnyslope visited their daughter, Mrs. Glen Johnston on Sunday.

Ernie must be changing his directions, as he is seen going straight west, instead of turning north.

Girls, if you are interested in housekeeping, watch out for Bill's girls, as he doesn't like "backing."

We are glad to hear that Misses Florence O'Brien and Betty Johnston are both home from the Hospital.

Mr. and Mrs. Lloyd Chandler and family spent Sunday with Mr. and Mrs. Laurence Chandler.

Mr. and Mrs. Roscoe Irwin and family are spending a few days at the home of Mr. and Mrs. Walter Irwin.

Mr. Thomas Johnston and son, of Munson, spent Sunday visiting at the home of Mr. and Mrs. Peter Johnston.

Misses Lilian Kynd and Ethel Krebs, Eddie Krebs and Harold Bliss, spent Sunday with Ethel and Eddie's grandparents, Mr. and Mrs. Cowitz.

Elkton Notes.

Mr. and Mrs. Jack Bagnshaw were visiting at the home of the latter's parents, Mr. and Mrs. Byrt, Sunday.

Mrs. Alex Hogg reported having seen a humming-bird in her flower garden two afternoons in succession.

Mrs. Lowick, who was visiting at the home of Mrs. A. H. Dobson, has returned to her home in Calgary.

Relatives and friends gathered at the home of Mr. and Mrs. Alex Blain on Sunday to celebrate the first anniversary of their wedding.

Mr. Alex McNaughton and Mr. George Clarke and son, of Eagle Hill, were dinner guests at the Alex Hogg home on Monday.

The ball game Sunday afternoon between the River Gang and Rugby resulted in a victory for the Gang by 8-6.

We are glad to hear that Laurence Oliver is recovering from his accident. His horse fell with him while returning from the dance at Elkton on Friday night. He was taken immediately to the home of Mr. W. Blain, where the doctor pronounced him suffering severely from shock and bruises.

Burnside Notes.

Miss Nola Finlay is spending a week with Miss Jessie Topley.

Lester Pross is spending a few days with Mr. Temmick Sick.

Mr. George Metz was a business visitor to Calgary on Saturday.

James McCulloch and Gus Bittner were in Calgary on Wednesday.

Miss Gertie McLean is spending a week with friends in the southern city.

Mr. Geo. Metz filled his sit with sunflowers and greenfeed on Sunday.

Miss Marjorie Inglis, of Calgary, has been spending her vacation at Mr. and Mrs. Hugh McLean's.

Master Billy Topley has been spending the holidays with his cousin, Edward Topley.
